## **Indian Science Congress: Centenary Celebration**

The Indian Science Congress Association was established on the model of the British Association for the Advancement of Science with primary objectives of advancing and promoting the cause of science in India and for holding an annual congress at different venues to foster interaction, research and publication among scientists within the country. The first session was held in Kolkata, then Calcutta, at The Asiatic Society during January 15-17, 2014. Hon'ble Justice Sir Asutosh Mookherjee, then the Vice Chancellor of the University of Calcutta was the President. Since then 99 sessions have been held at different venues across the country and the Centenary Session is going to be held once again in Kolkata in January 2013 and the University of Calcutta is the host University. Another special feature of this Centenary Session is that for the first time in the century old history of Indian Science Congress, Hon'ble Prime Minister in office Dr Manmohan Singh, is the elected General President.

To commemorate the centenary, ISCA is organizing many scientific events through its chapter network across the length and breadth of the country, with multiple objectives which inter alia include creating awareness on the role of science in shaping the future of the country.

To mark the occasion, ISCA, Kolkata Chapter is also organizing a two-day symposium on the focal theme 'Science for Shaping the Future of India'.
